Overview of the Implementation Strategy

Needs Prioritization

Included in Code Section 501(r)(3) is the requirement that hospitals must provide a description of the process and criteria used to determine the most significant health needs of the community identified through the CHNA, along with a description of the process and criteria used to determine the prioritized needs to be addressed by the hospital. Accordingly, Highpoint Health – Riverview with Ascension Saint Thomas used a phased prioritization approach to identify the needs of Smith County, Tennessee. The first step was to determine the broader set of identified needs. The CHNA assessment narrowed identified needs to a group of significant needs determined most crucial for community stakeholders to address.

After completing the CHNA assessment, significant needs were further narrowed down to prioritized needs that the hospital will address within the IS. To arrive at the prioritized needs, Highpoint Health – Trousdale with Ascension Saint Thomas collaborated with community groups and individuals, including community members, health care consumers, health care professionals, and multi-sector representatives, including the Trousdale County Health Department to facilitate a discussion during October 10, 2024 to prioritize the top three needs in the community. Highpoint Health – Trousdale with Ascension Saint Thomas identified additional criteria to prioritize the significant needs including:

- Magnitude: How many individuals does the problem affect?
- Seriousness of consequences: What would happen if the issue were not made a priority? What level of burden on the community (economic, social or other)?
- Feasibility: Is the problem preventable, and what is the community's capacity to address?
- Equity: Is one group of people being affected more than other groups? Are health outcomes different for different groups?

Needs That Will Be Addressed

During the Implementation Strategy (IS) brainstorming phase for Ascension Saint Thomas Hospitals, Community Benefit and leaders agreed to a collective impact model toward addressing needs that appeared in multiple counties. This model is an effort to allocate resources in ways that can more meaningfully impact priority areas. Highpoint Health – Trousdale with Ascension Saint Thomas has selected the community prioritized needs outlined below for its 2024 Implementation Strategy (IS). Ascension has defined “community prioritized needs” as the needs which have been prioritized by the hospital to address through the three-year CHNA cycle:
